Client Intake Form	3
Email Template Manager	3
Email Scheduling Tool	4
Email Marketing Platform (<i>Optional</i>)	4
Calendar Booking Tool	5
Paid Call Tool	5
My Favorite Tools	6

As you get started building out your Client Intake System, you'll need the following type of tools:

Client Intake Form

This is the application form that a prospect fills out when they apply to work with you. This is the defined entrance on your website.

- › [Wufoo](#)
- › [Typeform](#)
- › [Gravity Forms](#)

Email Template Manager

This is a template manager that you use to store emails that you send to prospects in communication.

- › [Yesware](#)
- › [Streak](#)

Email Scheduling Tool

This is a tool that you use to schedule emails that you send — or that you use to remind yourself of emails that you need to respond to.

- › [Yesware](#)
- › [Streak](#)
- › [Boomerang for Gmail](#)

Email Marketing Platform (*Optional*)

This is an optional tool that you can connect to your Client Intake Form so that when a prospect fills out the form to work with you, they're added to an automated sequence of emails that educates, nurtures, and qualifies them to work with you.

- › [GetDrip](#)

- › MailChimp
- › ConvertKit

Calendar Booking Tool

This is a booking tool that you use to allow prospects — who qualify — to schedule a time to talk with you.

- › Calendly
- › Time Trade
- › Schedule Once

Paid Call Tool

- › Clarity.fm
- › Moon Clerk

My Favorite Tools

Out of these, I personally use (and recommend) the following collection. This is all you need to get started.

- › **Client Intake Form** — [Gravity Forms](#) if you're on WordPress, otherwise [Wufoo](#)
- › **Email Template Manager** — [Yesware](#)
- › **Email Scheduling** — [Streak](#)
- › **Email Marketing Platform** — [Get Drip](#)
- › **Booking Tool** — [Calendly](#)
- › **Paid Calls** — [Clarity.fm](#)
